

MULTIDISCIPLINARY POSTDOCTORAL AWARD

A multidisciplinary research training opportunity that prepares future leaders to eradicate breast cancer.

The **Multidisciplinary Postdoctoral Award** is designed to identify and fund exceptionally talented recent doctoral graduates who are committed to broadening their research scope through significant, mentored training in more than one major discipline. A mentor should be identified for each of the disciplines represented within the proposed project. The disciplines must be disparate and may include, but are not limited to:

- Basic biological (including pathology);
- Clinical;
- Chemical;
- Social and behavioral;
- Engineering, physical, and mathematical; and
- Public health and health services research.

It is the responsibility of the applicant to clearly and explicitly articulate how the proposed disciplines are distinct and how the applicant will be an active participant in research involving each discipline.

Funding for this award can be requested for up to \$150,000 per year for direct costs. The period of performance may be requested for up to 3 years, with the maximum funding for a 3-year performance period being \$450,000. In addition, indirect costs should be added as appropriate.

Letter of Intent Is Due by:
January 23, 2007

This document is a synopsis of details specific to the Breast Cancer Research Program (BCRP) Multidisciplinary Postdoctoral Award. A detailed description of the mechanism with specific evaluation criteria, submission requirements, and deadlines is available in the FY06 BCRP Program Announcement.
