

Amyotrophic Lateral Sclerosis

Vision - Improve treatment and find a cure for ALS

Over the past few years, the ALSRP has instituted changes to the [Therapeutic Idea Award \(TIA\) and Therapeutic Development Award \(TDA\) mechanisms](#) to 1) include the development of new preclinical model systems and high throughput screens, 2) encourage academic and industry partnerships, and 3) incentivize incorporation of marker development/validation into proposals. Currently, the ALSRP is investigating new grant mechanisms to further break down barriers between academic labs, foundations, and industry.

CDMRP is proud to have consumers and researchers participate in every aspect of peer review, programmatic review, and vision setting. In this spirit, the ALSRP Programmatic Panel has chosen

to crowd-source the collective wisdom of the ALS research community as we consider possible new mechanisms and further improvements to our existing award mechanisms.

We hope you will take a few minutes to fill out the survey below to help us with this important task. Please complete this survey by October 18, 2019. All responses will be kept confidential. Thank you for your help with this important endeavor!
