Program Announcement

for the

Defense Health Program

Department of Defense
Congressionally Directed Medical Research Programs

Prostate Cancer Research Program

Laboratory - Clinical Transition Award

Funding Opportunity Number: W81XWH-13-PCRP-LCTA
Catalog of Federal Domestic Assistance Number: 12.420

SUBMISSION AND REVIEW DATES AND TIMES

- **Pre-Application Submission Deadline:** 5:00 p.m. Eastern time (ET), June 19, 2013
- **Invitation to Submit an Application:** August 2, 2013
- **Application Submission Deadline:** 11:59 p.m. ET, October 9, 2013
- **Peer Review:** December 2013
- **Programmatic Review:** February 2014

This Program Announcement is one of two documents with instructions to prepare and submit an application for this funding opportunity. The second document, the General Application Instructions, is available for downloading from Grants.gov.

I. FUNDING OPPORTUNITY DESCRIPTION

A. Program Description

Applications to the Fiscal Year 2013 (FY13) Prostate Cancer Research Program (PCRP) are being solicited for the Assistant Secretary of Defense for Health Affairs, Defense Health Program (DHP), by the U.S. Army Medical Research Acquisitions Activity (USAMRAA). The PCRP was initiated in 1997 to promote innovative research focused on eradicating prostate cancer. Appropriations for the PCRP from FY97 through FY12 totaled $1.21 billion. The FY13 appropriation is $80 million (M).

The mission of the FY13 PCRP is to find and fund research that will lead to the elimination of death from prostate cancer and enhance the well-being of men experiencing the impact of the disease. Specifically, the PCRP seeks to promote highly innovative, groundbreaking research; high-impact research with near-term clinical relevance; multidisciplinary, synergistic research; translational studies to support the fluid transfer of knowledge between bedside and bench; research on patient survivorship and quality of life; the next generation of prostate cancer investigators through mentored research; and research on disparities in the incidence and mortality of prostate cancer.

PCRP Overarching Challenges (revised for FY13)

Consistent with the program’s mission to eliminate death from prostate cancer and enhance the well-being of men experiencing the impact of the disease, including those from disproportionately affected populations, each PCRP funding opportunity either requires or encourages (see Award Information below) applications to address one of the following three PCRP overarching challenges:

- Develop better tools to detect clinically relevant disease in asymptomatic men
- Distinguish aggressive from indolent disease in men newly diagnosed with prostate cancer
- Develop effective treatments and address mechanisms of resistance for men with high risk or metastatic prostate cancer

PCRP Focus Areas (revised for FY13)

All applications for FY13 PCRP funding opportunities are also expected to address at least one of the following PCRP focus areas:

- **Biomarker Development:** Validation and qualification of biomarkers for early detection of clinically relevant disease or for prognosis or prediction and assessment of response to therapies
- **Genetics:** Understanding host or tumor genetics and epigenetics responsible for susceptibility, disease progression, and treatment outcomes for clinically relevant prostate cancer
- **Imaging:** Development of new anatomic, functional, and molecular imaging approaches for the detection and management of clinically relevant prostate cancer
• **Mechanisms of Resistance:** Understanding primary and acquired resistance to therapy
• **Survivorship and Palliative Care:** Improving the quality of life and well-being of prostate cancer patients and their families
• **Therapy:** Identification of new targets, pathways, and therapeutic modalities
• **Tumor and Microenvironment Biology:** Understanding the intrinsic and extrinsic mechanisms contributing to tumor development and the progression of prostate cancer

B. **Award Information**

The PCRP Laboratory - Clinical Transition Award (LCTA) mechanism was introduced in FY07. Since then, 95 applications have been received, and 12 have been recommended for funding.

The LCTA supports product-driven preclinical studies of promising lead agents or medical devices that have the potential to revolutionize prostate cancer clinical care. This award is intended to fund Principal Investigators (PIs) who lack support to conduct the preclinical studies needed to advance lead agents or medical devices to human testing, as follows:

**Lead Agents:** It is anticipated that lead agent development projects supported by this award will be generating pharmacology and toxicology data in preclinical studies for inclusion in a U.S. Food and Drug Administration (FDA) Investigational New Drug (IND) application and/or current Good Manufacturing Practice (cGMP) production. Applicants are expected to have a validated target and to have identified either one lead agent (or a limited number of lead agents for optimization) before applying for this award. In addition, the PI should present data establishing the mechanism of action of the lead agent on the target or preliminary data demonstrating reliability, reproducibility, and effectiveness (including sensitivity and specificity). **Lead agents are defined as novel biological and molecular or chemical therapeutic or imaging agents having potential clinical application to prostate cancer.** Examples of lead agents include, but are not limited to, novel chemotherapeutics, antibodies, nanoparticles, imaging contrast agents, and others.

**Medical Devices:** Projects to be supported by this award will test medical devices in preclinical studies with the intent for FDA Investigational Device Exemption (IDE) application and/or cGMP production of the medical device. As appropriate, the PI should present preliminary data demonstrating reliability, reproducibility, and effectiveness (including sensitivity and specificity) for the medical device. Examples of medical devices include, but are not limited to, diagnostic or prognostic tests (e.g., microfluidic device, genomic and genetic microarray devices), imaging devices, and other medical technology.

**Lead agents or medical devices supported by this award are expected to have high potential for commercial licensing for continued development and clinical use.** The PI must provide a transition plan (including potential funding and resources) to describe how the product will progress to clinical trials and/or delivery to market after the completion of the PCRP award. **The PCRP strongly encourages investigators to leverage existing resources with commercial partners to increase potential gains in translating preclinical research outcomes for continued development and clinical application. Applications that demonstrate cost-sharing with commercial partners are particularly encouraged.**
Applications must include strong scientific rationale and preliminary data relevant to the lead agent or medical device under development. Preliminary data must document target availability and distribution in relevant human tissues and must provide substantive information from model systems that supports the potential efficacy of the lead agent or medical device in humans. In addition, applications must describe a statistical/analytical plan to support the proposed studies, if applicable. These analyses must be consistent with current FDA guidance.

The National Cancer Institute has constructed developmental pathways for translational research that may be useful for designing translational research studies for support under the LCTA mechanism. These pathways are comprehensive and span the entire translational research continuum from discovery of a target to clinical trials (http://www.cancer.gov/images/trwg/Developmental-Pathway-Agent-Drug_Biologics.pdf).

**PIs applying to the LCTA are expected to address at least one of the PCRP focus areas and are highly encouraged to address one of the PCRP overarching challenges.** If the proposed project does not address any of the overarching challenges, the application should include a description to justify how the project will nevertheless address a critical need in the field of prostate cancer research and/or patient care.

**Studies proposed under this award may include, but are not limited to:**

- Comparative activity testing to optimize a lead agent and/or define a single lead agent from a limited library of candidates. **Such studies must be completed within 12 months of the start date of the award. If the lead agent has not been finalized within 12 months of award initiation, the Government reserves the right to terminate the award.**
- Toxicology screening
- Pharmacokinetics (e.g., absorption, distribution, metabolism, and excretion) studies
- Pharmacodynamic studies
- Radiation dosimetry
- Testing medical devices for safety or effectiveness in preclinical systems
- Development and validation of assays and reagents required to measure biological responses and molecular endpoints of the lead agent; **such studies may only be proposed in conjunction with lead agent development**
- Combination of the lead agent with agents already in clinical testing or practice
- cGMP production of the lead agent or medical device

**Studies proposed under this award should not include:**

- Target discovery
- Drug screening
- Early development of medical devices
• New combinations, formulations, or modifications of agents already in clinical testing or practice (other than in combination with the lead agent)
• Mechanism of action studies
• Prevention agents

The preclinical drug or medical device development process may require resources beyond those available at a single laboratory or organization. As such, the PI must disclose within the application any patents issued or pending and/or licenses granted and/or pending, with respect to the lead agent or medical device as well as any known patents that may block the development of the lead agent or device. The PI must provide documentation, such as a Material Transfer Agreement, of access to and permission to use all intellectual and material property. Participating organizations must be willing to resolve potential intellectual and material property issues and to remove organizational barriers that might interfere with the cooperation necessary to ensure that the proposed studies can be completed.

PIs are expected to abide by the FDA existing and proposed guidance governing the conduct of preliminary studies and the collection of data in support of an IND and IDE application. Websites with relevant information may include, but are not limited to:

- http://www.fda.gov/cder/regulatory/applications/ind_page_1.htm,
- http://www.fda.gov/MedicalDevices/DeviceRegulationandGuidance/HowtoMarketYourDevice/InvestigationalDeviceExemptionIDE/ucm046706.htm, and

*It is strongly encouraged that PIs begin discussions with the FDA early to determine FDA-driven milestones, which should be incorporated into the Statement of Work for the application.*

**Clinical trials will not be supported by the LCTA.** Other projects involving human subjects or human anatomical substances will be supported only if they are exempt from IRB review under Title 32 of the Code of Federal Regulations Section 219.101(b) (4) (32 CFR 219.101(b) (4)) or qualify for expedited review under 32 CFR 219.110 or 21 CFR 56.1102. **Applications proposing studies that do not qualify for exempt or expedited review status will be administratively withdrawn.** For definitions and other information on clinical trials and clinical research overall, the “Human Subject Resource Document” is provided on the CDMRP eReceipt System at https://cdmrp.org/Program_Announcements_and_Forms/.

All investigators applying to FY13 PCRP funding opportunities are encouraged to consider leveraging resources available through the PCRP-funded Prostate Cancer Biorepository Network (PCBN) (http://www.prostatebiorepository.org) and/or the North Carolina – Louisiana Prostate Cancer Project (PCaP) (http://www.ncla-pcap.org) if retrospectively collected human anatomical substances or correlated data are relevant to the proposed studies.

**The Congressionally Directed Medical Research Programs (CDMRP) intends that data and research resources generated under awards funded by this Program Announcement/Funding Opportunity be made available to the research community (which includes both scientific and consumer advocacy communities) and to the public at large. For additional guidance, refer to the General Application Instructions, Appendix 4, Section K.**
C. **Eligibility Information**

- The PI must be an independent investigator at or above the level of Assistant Professor (or equivalent).
- Cost sharing/matching is not an eligibility requirement.
- Organizations eligible to apply include national, international, for-profit, non-profit, public, and private organizations.
- Refer to the General Application Instructions, Appendix 1, for general eligibility information.

D. **Funding**

- The maximum period of performance is 3 years.
- The maximum allowable direct costs for the entire period of performance are $1,500,000 plus indirect costs.
- All direct and indirect costs of any subaward (subgrant or subcontract) must be included in the total direct costs of the primary award.
- The applicant may request the entire maximum funding amount for a project that may have a period of performance less than the maximum 3 years.
- Regardless of the period of performance proposed, the applicant may not exceed the maximum allowable direct costs. Indirect costs shall be proposed in accordance with the organization’s negotiated rate agreement.

Refer to the General Application Instructions, Section II.C.4., for budget regulations and instructions for the Research & Related Budget. **For all federal agencies or organizations collaborating with federal agencies, budget restrictions apply as are noted in Section II.C.4. of the General Application Instructions.**

In addition, for this award mechanism, direct costs:

- Must be requested for:
  - Travel for the PI and up to two additional members of the research team to attend one Department of Defense (DoD) PCRP Innovative Minds in Prostate Cancer Today (IMPaCT) meeting, which is held to disseminate the results of PCRP-sponsored research. Costs associated with travel to this meeting, up to $1,800 per person, should be included in Year 2 of the budget. For planning purposes, it should be assumed that the meeting will be held in the National Capital Area. These travel costs are in addition to those allowed for annual scientific/technical meetings.

- May be requested for (not all-inclusive):
  - Salary
  - Research supplies
  - Equipment
• Research-related subject costs (for studies with exempt or expedited review status only)
• Clinical research costs (clinical trials are not allowed)
• Support for collaborations
• Travel between collaborating organizations
• Travel costs of up to $1,800 per year per person for 2 individuals among the PI and the key personnel to attend scientific/technical meetings in addition to the required meeting described above

The CDMRP expects to allot approximately $4.8M of the $80M FY13 PCRP appropriation to fund approximately two Laboratory - Clinical Transition Award applications, depending on the quality and number of applications received. Funding of applications received in response to this Program Announcement/Funding Opportunity is contingent upon the availability of federal funds for this program.

II. SUBMISSION INFORMATION

Submission is a two-step process requiring both (1) pre-application submission through the CDMRP eReceipt System (https://cdmrp.org/) and (2) application submission through Grants.gov (http://www.grants.gov/).

Submission of applications that are essentially identical or propose essentially the same research project to different funding opportunities within the same program and fiscal year is prohibited and will result in administrative withdrawal of the duplicative application.

A. Where to Obtain the Application Package

To obtain the complete application package, including all required forms, perform a Grants.gov (http://www.grants.gov/) basic search using the Funding Opportunity Number: W81XWH-13-PCRP-LCTA.

B. Pre-Application Submission Content and Form

All pre-application components must be submitted by the PI through the CDMRP eReceipt System (https://cdmrp.org/). Because the invitation to submit an application is based on the contents of the pre-application, investigators should not change the title or research objectives after the pre-application is submitted.

PIs and organizations identified in the pre-application should be the same as those intended for the subsequent application submission. If any changes are necessary after submission of the pre-application, the PI must contact the CDMRP Help Desk at help@cdmrp.org or 301-682-5507. A change in PI or organization after submission of the pre-application will be allowed only at the discretion of the USAMRAA Contracting/Grants Officer.

The pre-application consists of the following components, which are organized in the CDMRP eReceipt System by separate tabs (refer to the General Application Instructions, Section II.B., for additional information on pre-application submission):
• Application Information – Tab 1

• Application Contacts – Tab 2

• Collaborators and Conflicts of Interest (COI) – Tab 3

FY13 PCRP Integration Panel (IP) members should not be involved in any preapplication or application. A list of FY13 PCRP IP members can be found at http://cdmrp.army.mil/pcrp/panels/panel13. For questions related to IP members and pre-applications or applications, refer to Section IV.C., Withdrawal, or contact the CDMRP Help Desk at help@cdmrp.org or 301-682-5507.

• Required Files – Tab 4

Preproposal Narrative (three-page limit): The Preproposal Narrative page limit applies to text and any non-text elements (e.g., figures, tables, graphs, photographs, diagrams, chemical structures, drawings, etc.) used to describe the proposed project. Inclusion of URLs that provide additional information to expand the Preproposal Narrative and could confer an unfair competitive advantage is prohibited and may result in administrative withdrawal of the application. Note: At this time, eReceipt is unable to read files made with Adobe Acrobat PDFMaker version 9.0 and higher.

The Preproposal Narrative should describe the proposed project using the following outline:

○ Background/Rationale: Clearly present the ideas and reasoning behind the proposed research; include relevant literature citations. Clearly describe the target, lead agent or device, and mechanism of action in prostate cancer.

○ Objective: State the objective(s) to be reached.

○ Research Approach: State the project’s specific aims and briefly describe the experimental approach to accomplishing the aims. This award cannot be used to conduct clinical trials.

○ Impact: Describe the potential short-term and long-term impact of this study on prostate cancer research and/or patient care. Briefly describe how the proposed study is responsive to one of the PCRP overarching challenges or, alternatively, provide a description to justify how the project will nevertheless address a critical need in prostate cancer clinical care.

Pre-Application Supporting Documentation: The items to be included as supporting documentation for the pre-application are limited to:

○ References Cited (one-page limit): List the references cited (including URLs if available) in the Preproposal Narrative using a standard reference format that includes the full citation (i.e., author[s], year published, title of reference, source of reference, volume, chapter, page numbers, and publisher, as appropriate).

○ List of Abbreviations, Acronyms, and Symbols: Provide a list of abbreviations, acronyms, and symbols used in the Preproposal Narrative.

○ PI and Key Personnel Biographical Sketches (four-page limit per individual)
• Submit Pre-Application – Tab 5

This tab must be completed for the pre-application to be accepted and processed by CDMRP.

• Other Documents Tab

No additional documents are required.

Pre-Application Screening

• Pre-Application Screening Criteria

To determine the technical merits of the pre-application and the relevance to the mission of the DHP and the PCRP, pre-applications will be screened by the PCRP IP based on the criteria shown below, which are of equal importance.

○ Intent of the Award Mechanism: To what degree the lead agent or medical device is sufficiently developed so that the award will effectively bring it toward IND or IDE application and/or cGMP production.

○ Research Approach: To what degree the experimental approach for accomplishing the specific aims is feasible and addresses the objective.

○ Impact: To what degree the lead agent or medical device is responsive to the PCRP overarching challenges, or is otherwise justified as significantly addressing another critical issue, and has the potential to revolutionize prostate cancer research and/or patient care.

• Notification of Pre-Application Screening Results

Following the pre-application screening, PIs will be notified as to whether or not they are invited to submit applications; however, they will not receive feedback (e.g., a critique of strengths and weaknesses) on their pre-application. The estimated timeframe for notification of invitation to submit an application is indicated on the title page of this Program Announcement/Funding Opportunity.

C. Application Submission Content and Form

Applications will not be accepted unless the PI has received notification of invitation.

Each application submission must include the completed application package of forms and attachments provided in Grants.gov for this Program Announcement/Funding Opportunity. The application package is submitted by the Authorized Organizational Representative through the Grants.gov portal (http://www.grants.gov/).

Grants.gov application package components: For the Laboratory - Clinical Transition Award, the Grants.gov application package includes the following components (refer to the General Application Instructions, Section II.C., for additional information on application submission):

1. SF 424 (R&R) Application for Federal Assistance Form: Refer to the General Application Instructions, Section II.C., for detailed information.
2. Attachments Form

- **Attachment 1: Project Narrative (25-page limit):** Upload as “ProjectNarrative.pdf.” The page limit of the Project Narrative applies to text and non-text elements (e.g., figures, tables, graphs, photographs, diagrams, chemical structures, drawings, etc.) used to describe the project. Inclusion of URLs that provide additional information to expand the Project Narrative and could confer an unfair competitive advantage is prohibited and will result in administrative withdrawal of the application.

Describe the proposed project in detail using the outline below. *The inclusion of preliminary data is required.* Any preliminary data provided should be from the laboratory of the PI or member(s) of the collaborating team.

- **Background:** Present the ideas and reasoning behind the proposed research; include relevant literature citations. Describe previous experience most pertinent to this application.

- **Lead Agent or Device:** Describe the target, the lead agent or device and its clinical utility, and the mechanism of action. Indicate whether the lead agent or device is being developed in partnership with another organization, and the nature of the partnership.

- **Objective:** State the overall objective(s) to be reached.

- **Specific Aims:** Concisely explain the project’s specific aims. If this application is part of a larger study, present only tasks that this award would fund.

- **Research Strategy:** Describe the experimental design for preclinical validation of the lead agent or device under development. Describe in detail the methods and analyses, including appropriate controls, a timeline for the completion of each proposed task, and how the approaches are compliant with FDA guidance for IND or IDE application. Address potential problems and present alternative methods and approaches. *Include a detailed Data and Statistical Analysis Plan, with emphasis on justifying plans for animal studies, if applicable.* If human subjects or human anatomical samples will be used, include a detailed plan for the recruitment of subjects or the acquisition of samples. *Projects involving human subjects or anatomical substances will be supported only if they are exempt or qualify for expedited review status. This award cannot be used to conduct clinical trials.*

- **Overarching Challenges and Focus Areas:** Describe how the proposed research is relevant to at least one of the PCRP focus areas and responsive to one of the PCRP overarching challenges. If the proposed project does not address any of the overarching challenges, provide a description to justify how the project will nevertheless significantly address a critical need in the field of prostate cancer research and/or patient care.

- **Attachment 2: Supporting Documentation.** Start each document on a new page. Combine and upload as a single file named “Support.pdf.” If documents are scanned to pdf, the lowest resolution (100 to 150 dpi) should be used. *There are no*
page limits for any of these components unless otherwise noted. Include only those components described below; inclusion of items not requested may result in the removal of those items or administrative withdrawal of the application.

○ References Cited: List the references cited (including URLs if available) in the project narrative using a standard reference format that includes the full citation (i.e., author[s], year published, title of reference, source of reference, volume, chapter, page numbers, and publisher, as appropriate).

○ List of Abbreviations, Acronyms, and Symbols: Provide a list of abbreviations, acronyms, and symbols.

○ Facilities, Existing Equipment, and Other Resources: Describe the facilities and equipment available for performance of the proposed project and any additional facilities or equipment proposed for acquisition at no cost to the award. Indicate whether or not Government-furnished facilities or equipment are proposed for use. If so, reference should be made to the original or present Government award under which the facilities or equipment items are now accountable. There is no form for this information.

○ Publications and/or Patent Abstracts (five-document limit): Include relevant publication URLs and/or patent abstracts. If publications are not publicly available, then a copy/copies of the published manuscript(s) must be included in Attachment 2. Extra items will not be reviewed.

○ Letters of Organizational Support: Provide a letter (or letters, if applicable), signed by the Department Chair or appropriate organization official, confirming the laboratory space, equipment, and other resources available for the project.

○ Letters of Collaboration (if applicable): Provide a signed letter from each collaborating individual or organization that will demonstrate that the PI has the support or resources necessary for the proposed work.

○ Patents and Permissions (if applicable): Disclose any patents, issued or pending, and/or licenses, granted and/or pending, with respect to the lead agent or device as well as any known patents that may block the development of the lead agent or device. The PI must provide documentation of access to and permission to use all intellectual and material property.

○ Intellectual Property
  – Background and Proprietary Information: All software and data first produced under the award are subject to a federal purpose license in accordance with applicable DoD Grant and Agreement Regulations (DoDGAR) requirements. Provide a list of all background intellectual property to be used in the project. Identify any proprietary information that will be provided to the Government and indicate whether the applicant will require a waiver of the federal purpose license.
  – Intellectual and Material Property Plan (if applicable): Provide a plan for resolving intellectual and material property issues among participating organizations.
Data and Research Resources Sharing Plan: Describe how data and resources generated during the performance of the project will be shared with the research community. Refer to the General Application Instructions, Appendix 4, for more information about the CDMRP expectations for making data and research resources publicly available.

- **Attachment 3: Technical Abstract (one-page limit):** Upload as “TechAbs.pdf.”
  The technical abstract is used by all reviewers. Programmatic reviewers do not typically have access to the full application and therefore rely on the technical abstract for appropriate description of the project’s key aspects. Therefore clarity and completeness within the space limits of the technical abstract are highly important.

Describe the proposed research project including the following elements:
- Background: Present the ideas and reasoning behind the proposed project.
- Objective: State the objective to be reached. Provide evidence or rationale that supports the objective.
- Specific Aims: State the specific aims of the study.
- Study Design: Briefly describe the study design.
- Impact: Summarize the potential impact of the proposed project on the elimination of death from prostate cancer and enhancing the well-being of men experiencing the impact of the disease.

- **Attachment 4: Lay Abstract (one-page limit):** Upload as “LayAbs.pdf.”
  Lay abstracts should be written using the outline below. Do not duplicate the technical abstract. Minimize use of acronyms and abbreviations, where appropriate. The lay abstract is an important component of the application review process because it addresses issues of particular interest to the consumer advocate community.
  - Describe the scientific objective and rationale for the proposed project in a manner that will be readily understood by readers without a background in science or medicine.
  - Describe the ultimate applicability of the research.
    - What types of patients will it help, and how will it help them?
    - What are the potential clinical applications, benefits, and risks?
    - What is the projected time it may take to achieve a patient-related outcome?

- **Attachment 5: Statement of Work (SOW) (three-page limit):** Upload as “SOW.pdf.” Refer to the General Application Instructions, Section II.C., for detailed information, including guidance on appropriate SOW formats.
• **Attachment 6:** Impact Statement (one-page limit): Upload as “Impact.pdf.”
  Explain in detail why the proposed research project is important, as follows:
  
  **Describe the short-term impact:** Detail the anticipated outcome(s)/product(s) that will be directly attributed to the results of the proposed research.
  
  **Describe the long-term impact:** Explain the anticipated long-term gains from the proposed research, including how the new product may ultimately contribute to the goal of elimination of death from prostate cancer and enhancing the well-being of men experiencing the impact of the disease.
  
  **PCRP overarching challenges:** Summarize how the proposed project addresses one of the PCRP overarching challenges or another critical issue in prostate cancer research and/or patient care. State explicitly how the proposed work and the lead agent or medical device to be developed will, if successful, have an impact on prostate cancer research and/or clinical care.
  
• **Attachment 7:** Transition Plan (one-page limit): Upload as “Transition.pdf.”
  Provide information on the methods and strategies proposed to move the product to clinical trial and/or delivery to market upon successful completion of the award. The transition plan should include the components listed below.
  
  ○ A description of the expected outcome(s) that will result after completion of the proposed research project. Outcomes should be specific and measurable.
  
  ○ Details of the funding strategy that will be used to bring the outcomes to clinical trial and/or delivery to market (e.g., specific potential commercial partners, specific funding opportunities to be applied for, etc.).
  
  ○ A description of collaborations and other resources that will be used to provide continuity of development.
  
  ○ A brief schedule and milestones for bringing the outcome(s) to clinical trial and/or delivery to market.
  
  ○ A risk analysis for cost, schedule, manufacturability, and sustainability.

3. **Research & Related Senior/Key Person Profile (Expanded):** Refer to the General Application Instructions, Section II.C., for detailed information. **Note: Some of the items in this attachment may be made available for programmatic review.**

  • PI Biographical Sketch (four-page limit): Upload as “Biosketch_LastName.pdf.”
  
  • PI Previous/Current/Pending Support (no page limit): Upload as “Support_LastName.pdf.”
  
  • Key Personnel Biographical Sketches (four-page limit each): Upload as “Biosketch_LastName.pdf.”
  
  • Key Personnel Previous/Current/Pending Support (no page limit): Upload as “Support_LastName.pdf.”
4. **Research & Related Budget:** Refer to the General Application Instructions, Section II.C., for detailed information.
   - Budget Justification (no page limit): Upload as “BudgetJustification.pdf.”

5. **Project/Performance Site Location(s) Form:** Refer to the General Application Instructions, Section II.C., for detailed information.

6. **R & R Subaward Budget Attachment(s) Form (if applicable):** Refer to the General Application Instructions, Section II.C., for detailed information.

D. **Submission Dates and Times**

All submission dates and times are indicated on the **title page** of this Program Announcement/Funding Opportunity. Pre-application and application submissions are required. Failure to meet any one of the deadlines will result in application rejection.

E. **Other Submission Requirements**

Refer to the General Application Instructions, Appendix 2, for detailed formatting guidelines.

All applications must be submitted through Grants.gov. Applicant organizations and all subrecipient organizations must have a Data Universal Numbering System (DUNS) number to submit applications to Grants.gov. The applicant organization must also be registered in the Entity Management functional area of the System for Award Management (SAM) with an “Active” status to submit applications through the Grants.gov portal. Refer to the General Application Instructions, Appendix 3, for information on Grants.gov requirements.

III. **APPLICATION REVIEW INFORMATION**

A. **Application Review and Selection Process**

All applications are evaluated by scientists, clinicians, and consumer advocates using a two-tier review process. The first tier is a peer review of applications against established criteria for determining technical merit. The second tier is a programmatic review that makes recommendations for funding to the Commanding General, U.S. Army Medical Research and Materiel Command, based on technical merit, the relevance to the mission of the DHP and PCRP, and the specific intent of the award mechanism. The highest-scoring applications from the first tier of review are not automatically recommended for funding. Additional information about the two-tier review process used by the CDMRP can be found at [http://cdmrp.army.mil/about/fundingprocess](http://cdmrp.army.mil/about/fundingprocess).

All CDMRP review processes are conducted confidentially to maintain the integrity of the merit-based selection process. Panel members sign a non-disclosure statement that application and evaluation information will not be disclosed outside the panel. Violations of confidentiality can result in the dissolving of a panel(s) and other corrective actions. In addition, personnel at the applicant or collaborating organizations are prohibited from contacting persons involved in the review process to gain protected evaluation information or to influence the evaluation process.
Violations of these prohibitions will result in the administrative withdrawal of the organization’s application. Violations by panel members or applicants that compromise the confidentiality of the review process may also result in suspension or debarment from federal awards. Furthermore, the unauthorized disclosure of confidential information of one party to another third party is a crime in accordance with Title 18 United States Code 1905.

B. Application Review Criteria

1. **Peer Review**: To determine technical merit, all applications will be evaluated according to the following scored criteria; of these, Lead Agent/Device, Research Strategy and Feasibility, and Impact are equally the most important, with the remaining criteria listed in decreasing order of importance:

   - **Lead Agent/Device**
     - Whether the PI has identified a well-defined target, and how well the preliminary data support the validity of the target for prostate cancer.
     - To what extent the development of the lead agent or device is justified by a sound scientific rationale that is supported by a critical analysis of the relevant literature, preliminary data, and logical reasoning.
     - To what extent there is likelihood for commercial licensing of the lead agent or device.
     - How the PI has clearly documented, with supporting preliminary and/or published data, that the mechanism of action of the lead agent or device on the target has been established.

   - **Research Strategy and Feasibility**
     - To what extent the study has the potential of developing a viable lead agent or device that would be ready for cGMP production.
     - If applicable, whether the PI has presented a clear and feasible plan to narrow a small library of potential lead agents to one lead agent within the first 12 months after award initiation.
     - How well the objectives, aims, experimental design, methods, and analyses are developed.
     - How well the PI acknowledges potential problems and addresses alternative approaches.
     - Whether the proposal includes a clear and appropriately powered statistical plan, if applicable.
     - How well the research strategy complies with FDA recommendations for studies in support of IND or IDE applications.
     - If applicable, whether the PI has presented an Intellectual and Material Property Plan sufficient to resolve potential issues among participating organizations, including the acknowledgement of and compliance with relevant patents and permissions.
• Impact
  ○ To what extent the lead agent or device, if successfully developed, will have a major impact on prostate cancer clinical care and, ultimately, the elimination of death from prostate cancer and enhancing the well-being of men experiencing the impact of the disease.
  ○ How the proposed research addresses one of the PCRP overarching challenges or is otherwise justified as significantly addressing another critical issue in prostate cancer research and/or patient care.

• Transition Plan
  ○ Whether the plan for bringing the product to clinical trials or delivery to market, including potential funding strategies, is well developed.
  ○ To what extent the expected outcome(s) that will result after completion of the proposed research project are specific and measurable.
  ○ Whether plans for appropriate collaborations and other resources for providing continuity of development are well described.
  ○ To what extent the schedule and milestones for bringing the outcome(s) to clinical trial and/or delivery to market are appropriate.
  ○ Whether an appropriately developed potential risk analysis for cost, schedule, manufacturability, and sustainability is provided.

• Personnel
  ○ To what degree the research team’s background and prostate cancer-related expertise are appropriate with respect to its ability to perform the proposed work.
  ○ To what degree the levels of effort are appropriate for successful development of the lead agent or device.
  ○ Whether letters of collaboration are provided for any proposed collaborative arrangements (if applicable).

In addition, the following unscored criteria will also contribute to the overall evaluation of the application:

• Environment
  ○ To what degree the scientific environment is appropriate for the proposed research.
  ○ How well the research requirements are supported by the availability of and accessibility to facilities and resources (including collaborative arrangements).
  ○ To what degree the quality and extent of organizational support are appropriate.

• Budget
  ○ Whether the budget is appropriate for the proposed research and within the limitations of this Program Announcement/Funding Opportunity.
• Application Presentation
  ○ To what extent the writing, clarity, and presentation of the application components influenced the review.

2. Programmatic Review: To make funding recommendations, the following equally considered criteria are used by programmatic reviewers:

a. Ratings and evaluations of the peer reviewers
b. Relevance to the mission of the DHP and FY13 PCRP, as evidenced by the following:
   • Adherence to the intent of the award mechanism
   • Programmatic relevance in relation to the PCRP overarching challenges and focus areas
   • Relative impact
   • Program portfolio composition

C. Recipient Qualification

For general information on required qualifications for award recipients, refer to the General Application Instructions, Appendix 1.

D. Application Review Dates

All application review dates and times are indicated on the title page of this Program Announcement/Funding Opportunity.

E. Notification of Application Review Results

Each PI and organization will receive notification of the funding recommendation. Each PI will receive a peer review summary statement on the strengths and weaknesses of the application.

IV. ADMINISTRATIVE ACTIONS

After receipt of pre-applications from the CDMRP eReceipt System or applications from Grants.gov, the following administrative actions may occur:

A. Rejection

The following will result in administrative rejection of the pre-application:
   • Preproposal Narrative exceeds page limit.
   • Preproposal Narrative is missing.
The following will result in administrative rejection of the application:

- Submission of an application for which a letter of invitation was not received.
- Project Narrative exceeds page limit.
- Project Narrative is missing.
- Budget is missing.
- Submission of the same research project to different funding opportunities within the same program and fiscal year.

B. Modification

- Pages exceeding the specified limits will be removed prior to review for all documents other than the Preproposal Narrative and Project Narrative.
- Documents not requested will be removed.
- Following the application deadline, the PI may be contacted by CDMRP via email with a request to provide certain missing supporting documents (excluding those listed in Section IV.A., Rejection). The missing documents must be provided by 5:00 p.m. ET on the second full business day following the date the email was sent. Otherwise, the application will be reviewed as submitted.

C. Withdrawal

The following may result in administrative withdrawal of the pre-application or application:

- A FY13 PCRP IP member is named as being involved in the research proposed or is found to have assisted in the pre-application or application processes including, but not limited to, concept design, application development, budget preparation, and the development of any supporting document. A list of the FY13 PCRP IP members can be found at [http://cdmrp.army.mil/pcrp/panels/panel13](http://cdmrp.army.mil/pcrp/panels/panel13).
- The application does not conform to this Program Announcement/Funding Opportunity description to an extent that precludes appropriate review.
- Direct costs as shown on the Research & Related Budget exceed the maximum allowed by this Program Announcement/Funding Opportunity.
- Inclusion of URLs, with the exception of links in References Cited and Publication and/or Patent Abstract sections.
- Page size is larger than 8.5 inches x 11.0 inches (approximately 21.59 cm x 27.94 cm).
- Inclusion of any employee of CDMRP review contractors in applications for funding without adequate plans to mitigate conflicts of interest. Refer to the General Application Instructions, Section II.B., for detailed information.
- Personnel from applicant or collaborating organizations are found to have contacted persons involved in the review process to gain protected evaluation information or to influence the evaluation process.
• The application includes a clinical trial or human subject studies that do not qualify for exempt or expedited review status.
• The PI does not meet the eligibility criteria as described in this Program Announcement/Funding Opportunity.

D. Withhold
Applications that appear to involve research misconduct will be administratively withheld from further consideration pending institutional investigation. The institution will be required to provide the findings of the investigation to the USAMRAA Grants Officer for a determination of the final disposition of the application.

V. AWARD ADMINISTRATION INFORMATION

A. Award Notice
Awards will be made no later than September 30, 2014. Refer to the General Application Instructions, Appendix 4, for additional award administration information.

B. Administrative and National Policy Requirements
Refer to the General Application Instructions, Appendix 4, Section D, for general information regarding administrative and national policy requirements.

C. Reporting
Reporting requirements, specific to each award, will be established during award negotiations. Well-defined milestones will be incorporated into the assistance agreement. The government reserves the right to terminate awards that do not achieve the established milestones.

Refer to the General Application Instructions, Appendix 4, Section E, for general information on reporting requirements.

D. Award Transfers
Refer to the General Application Instructions, Appendix 4, Section F, for general information on organization or PI changes.
VI. AGENCY CONTACTS

A. CDMRP Help Desk

Questions related to Program Announcement/Funding Opportunity content or submission requirements as well as questions related to the submission of the pre-application through the CDMRP eReceipt System should be directed to the CDMRP Help Desk, which is available Monday through Friday from 8:00 a.m. to 5:00 p.m. ET. Response times may vary depending upon the volume of inquiries.

- Phone: 301-682-5507
- Email: help@cdmrp.org

B. Grants.gov Contact Center

Questions related to application submission through the Grants.gov portal should be directed to the Grants.gov Contact Center, which is available 24 hours a day, 7 days a week (closed on U.S. federal holidays). Note that the CDMRP Help Desk is unable to provide technical assistance with Grants.gov submission.

- Phone: 800-518-4726
- Email: support@grants.gov

Sign up on Grants.gov for “send me change notification emails” by following the link on the Synopsis page for the Program Announcement/Funding Opportunity or by responding to the prompt provided by Grants.gov when first downloading the application package. If the application package is updated or changed, the original version of the application package may not be accepted by Grants.gov.
## VII. APPLICATION SUBMISSION CHECKLIST

<table>
<thead>
<tr>
<th>Grants.gov Application Components</th>
<th>Action</th>
<th>Completed</th>
</tr>
</thead>
<tbody>
<tr>
<td>SF-424 (R&amp;R) Application for Federal Assistance Form</td>
<td>Complete form as instructed.</td>
<td></td>
</tr>
<tr>
<td>Attachments Form</td>
<td>Upload Project Narrative (ProjectNarrative.pdf) as Attachment 1.</td>
<td></td>
</tr>
<tr>
