Program Announcement

for the

Department of Defense
Defense Health Program

Congressionally Directed Medical Research Programs

Prostate Cancer Research Program

Exceptional Responders Award

Funding Opportunity Number: W81XWH-15-PCRP-ERA
Catalog of Federal Domestic Assistance Number: 12.420

SUBMISSION AND REVIEW DATES AND TIMES

• Pre-Application Deadline: 5:00 p.m. Eastern time (ET), June 25, 2015
• Invitation to Submit an Application: July 2015
• Application Submission Deadline: 11:59 p.m. ET, September 24, 2015
• End of Application Verification Period: 5:00 p.m. ET, September 29, 2015
• Peer Review: November 2015
• Programmatic Review, Stage 1: January 2016
• Invitation for Oral Presentation: January 2016
• Programmatic Review, Stage 2: February 2016

The CDMRP eReceipt System has been replaced with the electronic Biomedical Research Application Portal (eBRAP). Principal Investigators and organizational representatives should register in eBRAP as soon as possible. All pre-applications must be submitted through eBRAP. In addition, applications submitted through Grants.gov will now be available for viewing, modification, and verification in eBRAP prior to the end of the application verification period.

This Program Announcement/Funding Opportunity is one of two documents with instructions to prepare and submit an application for this funding opportunity. The second document, the General Application Instructions, is available for downloading from Grants.gov.

I. FUNDING OPPORTUNITY DESCRIPTION

A. Program Description

Applications to the Fiscal Year 2015 (FY15) Prostate Cancer Research Program (PCRP) are being solicited for the Defense Health Agency, Research, Development, and Acquisition (DHA RDA) Directorate, by the U.S. Army Medical Research Acquisition Activity (USAMRAA). As directed by the Office of the Assistant Secretary of Defense for Health Affairs, the DHA RDA Directorate manages and executes the Defense Health Program (DHP) Research, Development, Test, and Evaluation (RDT&E) appropriation. The executing agent for this Program Announcement/Funding Opportunity is the Congressionally Directed Medical Research Programs (CDMRP). The PCRP was initiated in 1997 to promote innovative research focused on eradicating prostate cancer. Appropriations for the PCRP from FY97 through FY14 totaled $1.37 billion. The FY15 appropriation is $80 million (M).

The mission of the FY15 PCRP is to find and fund research that will lead to the elimination of death from prostate cancer and enhance the well-being of men experiencing the impact of the disease. Specifically, the PCRP seeks to promote highly innovative, groundbreaking research; high-impact research with near-term clinical relevance; multidisciplinary, synergistic research; translational studies to support the fluid transfer of knowledge between bedside and bench; research on patient survivorship and quality of life; the next generation of prostate cancer investigators through mentored research; and research on disparities in the incidence and mortality of prostate cancer.

The FY15 funding opportunities offered by the PCRP attempt to address these priorities with a reduced number of award mechanisms. The PCRP has consolidated many of the discipline-specific mechanisms that have been offered in prior fiscal years to provide a more simplified funding approach focused around the program’s priorities of innovation, impact, and training. Specific mechanisms also incorporate options to support both individual awards and team-based awards. All mechanisms continue to maintain the program’s focus toward meeting the PCRP mission.

PCRP Overarching Challenges

Consistent with the program’s mission to eliminate death from prostate cancer and enhance the well-being of men experiencing the impact of the disease, including those from disproportionately affected populations, each PCRP funding opportunity either requires or encourages (see Section I.C., Award Information) applications to address one of the following four PCRP overarching challenges:

- Develop better tools for early detection of clinically relevant disease
- Distinguish aggressive from indolent disease in men newly diagnosed with prostate cancer
- Develop effective treatments and address mechanisms of resistance for men with high-risk or metastatic prostate cancer
- Develop strategies to optimize the physical and mental health of men with prostate cancer
B. PCRP Focus Areas (revised for FY15)

All applications for the FY15 Exceptional Responders Award are required to address the following PCRP focus area:

- **Mechanisms of Resistance and Response:** Understanding primary and acquired resistance as well as exceptional response to therapy

However, it is expected that applications will also address at least one of the other FY15 PCRP focus areas:

- **Biomarker Development:** Qualification and validation of biomarkers for early detection of clinically relevant disease, prognosis, and prediction and assessment of response to therapies.
- **Genetics:** Understanding host or tumor genetics and epigenetics responsible for susceptibility, disease progression, and treatment outcomes for clinically relevant prostate cancer.
- **Imaging:** Development of new anatomic, functional, and molecular imaging approaches for the detection and management of clinically relevant prostate cancer.
- **Survivorship and Palliative Care:** Improving the quality of life and well-being of prostate cancer patients and their families.
- **Therapy:** Identification of targets and pathways, and optimization (including sequencing and combination therapies) of therapeutic modalities, including metastatic prostate cancer.
- **Tumor and Microenvironment Biology:** Understanding prognosis and progression of prostate cancer.

C. Award Information

The PCRP Exceptional Responders Award (ERA) mechanism is being offered for the first time in FY15. This award supports a research effort conducted by leading prostate cancer researchers that specifically focuses on identifying and understanding predictors of disease outcomes in exceptional responders to prostate cancer therapies. Research projects proposed under the ERA can be either discovery or target-driven but must include an in-depth examination of outlier responses to prostate cancer therapy that will lead to significant improvements to the clinical management of prostate cancer. The research project should address overarching issues that have broad implications for the disease and risk management, such as risk factors at the individual level and systems level, treatment, toxicity, and dormancy. The research project should not focus merely on the study of specific molecular pathways or genes, but should be focused on identifying what is unique to exceptional responders, which may include biological, behavioral, or other lifestyle factors. It is expected that inclusion and exclusion criteria for identifying Exceptional Responders, including the specific type of therapy/therapies being addressed, will be clearly defined in the application. The PCRP encourages inclusion of any form of prostate cancer therapy that produces a disparate response in treated patients, although projects addressing exceptional responses to androgen deprivation therapies are particularly encouraged.
All projects proposed for the ERA are required to address one of the PCRP overarching challenges and the PCRP focus area of Mechanisms of Resistance. However, it is expected that applications will address more than one focus area.

Key aspects of this award include:

**Impact:** Research funded by the ERA will demonstrate the potential to make a significant impact on the clinical management of prostate cancer. Applications must articulate the pathway to making a clinical impact for individuals with, or at risk for, prostate cancer, even if clinical impact is not an immediate outcome.

**Personnel:** The PI(s) are expected to engage and assemble an appropriate, robust research team who will combine resources and expertise into a synergistic collaboration to enable successful conduct of the project. The primary PI (or Initiating PI for those including the Partnering PI Option) should possess a track record of success in leading a research team. Multidisciplinary teams including clinical specialists, scientists, and/or pathologists are encouraged. Collaboration with personnel affiliated with established prostate cancer biorepositories are highly encouraged. Investigators are specifically encouraged to consider leveraging resources available through the PCRP-funded Prostate Cancer Biorepository Network (PCBN) (http://www.prostatebiorepository.org/) and/or the North Carolina – Louisiana Prostate Cancer Project (PCaP) (http://www.ncla-pcap.org).

**Data- and Research Resource-Sharing Plan:** It is the intent of the PCRP ERA that data and research resources generated by funded research activities be made available to the research community (which includes both scientific and consumer advocacy communities) and to the public at large. Each proposal should include a data- and/or research resource-sharing plan describing how unique and/or final research data will be shared, along with any resulting research resources. This information should be provided as the Data- and Research Resource-Sharing Plan as described in Section II.C., Full Application Submission Content, of this Program Announcement/Funding Opportunity. Refer also to the General Application Instructions, Appendix 4, for more information. PIs are strongly encouraged to also consider submitting tissue specimens from potential exceptional responders to the National Cancer Institute’s Exceptional Responders Initiative (refer to http://www.cancer.gov/newscenter/newsfromnci/2014/ExceptionalRespondersQandA).

**Use of Human Subjects:** The ERA supports research involving human subjects, including correlative studies, but is restricted to studies without clinical trials. A clinical trial is defined as a prospective accrual of human subjects where an intervention (e.g., device, drug, biologic, surgical procedure, rehabilitative modality, behavioral intervention or other) is tested on a human subject for a measurable outcome with respect to exploratory information, safety, effectiveness, and/or efficacy. Correlative studies that derive from both ongoing and completed clinical trials supported by other funding sources are allowed and encouraged. The inclusion and exclusion criteria for patients defined as exceptional responders must be clearly defined in the application. PIs seeking funding for a clinical trial should consider submitting an application to an alternative FY15 PCRP Program Announcement/Funding Opportunity. For definitions and other information on clinical trials and clinical research overall, the “Human Subject Resource Document” is provided at https://ebrap.org/eBRAP/public/Program.
All Department of Defense (DoD)-funded research involving new and ongoing research with human anatomical substances, human subjects, or human cadavers must be reviewed and approved by the U.S. Army Medical Research and Materiel Command (USAMRMC) Office of Research Protections (ORP), Human Research Protection Office (HRPO), in addition to the local Institutional Review Board (IRB) of record. Local IRB approval at the time of submission is not required. The HRPO is mandated to comply with specific laws and requirements governing all research involving human anatomical substances, human subjects, or human cadavers that is supported by the DoD. These laws and requirements will necessitate information in addition to that supplied to the IRB. Allow a minimum of 2 to 3 months for HRPO regulatory review and approval processes. Refer to the General Application Instructions, Appendix 5, and the Human Subject Resource Document available on the eBRAP “Funding Opportunities & Forms” web page (https://ebrap.org/eBRAP/public/Program.htm) for additional information.

**Partnering PI Option:** The Partnering PI Option is structured to accommodate up to a total of three PIs. One PI will be identified as the Initiating PI and will be responsible for the majority of the administrative tasks associated with application submission. The other PI(s) will be identified as Partnering PIs. Initiating and Partnering PIs each have different submission requirements as described in Section II; however, all PIs should contribute significantly to the development of the proposed research project. The PIs may have expertise in similar or disparate scientific disciplines. It is the responsibility of the collaborating investigators to describe how their combined expertise will combine and synergize to maximize the project’s outcomes. If recommended for funding, each PI will receive his or her own award.

**Oral Presentation:** An oral presentation to the PCRP Integration Panel (IP) is a requirement for application review as described below:

* **Programmatic Review, Stage 2:** An Initiating PI whose application is selected for final consideration in Stage 2 of the Programmatic Review will be required to give an oral presentation that will be held in the National Capital Area in February 2016.

The CDMRP intends that information, data, and research resources generated under awards funded by this Program Announcement/Funding Opportunity be made available to the research community (which includes both scientific and consumer advocacy communities) and to the public at large. For additional guidance, refer to the General Application Instructions, Appendix 3, Section L.

**D. Eligibility Information**

- Independent investigators at or above the level of Assistant Professor (or equivalent) are eligible to submit an application.
- Cost sharing/matching is not an eligibility requirement.
- Eligible investigators must apply through an organization. Organizations eligible to apply include national, international, for-profit, nonprofit, public, and private organizations.
- Refer to the General Application Instructions, Appendix 1, for general eligibility information.
E. Funding

- The maximum period of performance is 3 years.
- The anticipated direct costs budgeted for the entire period of performance will not exceed $2.5M. Associated indirect costs can be budgeted in accordance with the organization’s negotiated rate. No budget will be approved by the Government exceeding $2.5M direct costs or using an indirect rate exceeding the organization’s negotiated rate.
- Partnering PI Option:
  - The anticipated combined direct costs budgeted for the entire period of performance for the Initiating PI and the Partnering PI(s) applications will not exceed $2.5M. The combined total direct costs of Initiating PI and the Partnering PI(s) awards will not exceed $2.5M direct costs. If the Initiating PI’s or Partnering PI’s budgets contain a subaward (or multiple subawards), all direct and indirect costs of the subaward(s) must be included in the direct costs of the primary award. Collaborating organizations should budget associated indirect costs in accordance with each organization’s negotiated rate. The combined budgeted direct costs approved by the Government will not exceed $2.5M or use an indirect rate exceeding each organization’s negotiated rate. A separate award will be made to each PI’s organization, even if the PIs are at the same organization.
- All direct and indirect costs of any subaward (subgrant or subcontract) must be included in the total direct costs of the primary award.
- The applicant may request the entire maximum funding amount for a project that may have a period of performance less than the maximum 3 years.

Refer to the General Application Instructions, Section II.C.5., for budget regulations and instructions for the Research & Related Budget. For all Federal agencies or organizations collaborating with Federal agencies, budget restrictions apply as are noted in Section II.C.5. of the General Application Instructions.

For this award mechanism, direct costs must be requested for:

- Travel costs for the PI(s) to attend a 1-day meeting to be held in the National Capital Area during the award period of performance. This meeting will be held to provide a presentation on progress. These travel costs are in addition to those allowed for annual scientific/technical meetings, and should be included in Year 2 of the budget.

May be requested for (not all-inclusive):

- Salary
- Research supplies
- Equipment
- Research-related subject costs
- Clinical research costs (other than costs for clinical trials, which are not allowed)
- Purchase of datasets and/or databases
• Travel between collaborating organizations

• Travel costs to attend scientific/technical meetings. *The Government reserves the right to direct the selection of one of these meetings, should a PCRP-sponsored meeting be convened during the award period of performance.*

Intramural (DoD), other Federal agency, and extramural investigators are encouraged to apply to this Program Announcement/Funding Opportunity. An intramural investigator is defined as a DoD military or civilian employee working within a DoD laboratory or medical treatment facility, or working in a DoD activity embedded within a civilian medical center. Intramural applicants and collaborators are reminded to coordinate receipt and commitment of funds through their respective resource managers. It is permissible for an intramural investigator to be named as a collaborator on an application submitted by an extramural investigator. *In such cases, the extramural investigator must include a letter from the intramural collaborator’s Commander or Commanding Officer that authorizes the involvement of the intramural collaborator.*

As required of all applicants to this Program Announcement/Funding Opportunity, if PIs from Federal agencies submit applications, they must submit through Grants.gov. Therefore, Federal applicants must be familiar with Grants.gov requirements, including the need for an active System for Award Management (SAM) registration and a Data Universal Numbering System (DUNS) number. Refer to Section II.A. of the General Application Instructions for further information regarding Grants.gov requirements.

Awards to extramural organizations will consist solely of assistance agreements (Cooperative Agreements and Grants). Awards to intramural agencies and other Federal agencies may be executed through a direct fund transfer (e.g., the Military Interdepartmental Purchase Request [MIPR] or Funding Authorization Document [FAD] process). Direct transfer of funds from the recipient to a Federal agency is not allowed except under very limited circumstances. Refer to the General Application Instructions, Section II.C.5. Research & Related Budget, for additional information on budget considerations for applications involving Federal agencies.

*The CDMRP expects to allot approximately $4M of the $80M FY15 appropriation to fund approximately 1 Exceptional Responders Award application, depending on the quality and number of applications received. Funding of applications received in response to this Program Announcement/Funding Opportunity is contingent upon the availability of Federal funds for this program.*

II. SUBMISSION INFORMATION

Submission of applications that are essentially identical or propose essentially the same research project to different funding opportunities within the same program and fiscal year is prohibited and will result in administrative withdrawal of the duplicative application.

Submission is a two-step process requiring both (1) pre-application submission through the electronic Biomedical Research Application Portal (eBRAP) (https://eBRAP.org/) and (2) application submission through Grants.gov (http://www.grants.gov/). Refer to the General
Application Instructions, Section II.A. for registration and submission requirements for eBRAP and Grants.gov.

eBRAP is a multifunctional web-based system that allows PIs to submit their pre-applications electronically through a secure connection, to view and edit the content of their pre-applications and full applications, to receive communications from the CDMRP, and to submit documentation during award negotiations and period of performance. A key feature of eBRAP is the ability of an organization’s representatives and PIs to view and modify the Grants.gov application submissions associated with them. eBRAP will validate Grants.gov application files against the specific Program Announcement/Funding Opportunity requirements and discrepancies will be noted in an email to the PI and in the Full Application Files tab in eBRAP. It is the applicant’s responsibility to review all application components for accuracy as well as ensure proper ordering as specified in this Program Announcement/Funding Opportunity.

PIs should ensure that their name and email address are the same as the name and email address that will be provided on the SF-424 Form of the Grants.gov application package submitted to Grants.gov. The organization, Business Officials, PI(s), and eBRAP log number named in the full application submitted to Grants.gov must match those named in the pre-application in eBRAP.

**Application viewing, modification, and verification in eBRAP is strongly recommended, but not required. The Project Narrative and Budget cannot be changed after the application submission deadline. Any other application component cannot be changed after the end of the application verification period.**

**Partnering PI Option:** The ERA mechanism is structured to accommodate up to a total of three PIs. One PI will be identified as the Initiating PI and will be responsible for the majority of the administrative tasks associated with application submission. The other PI(s) will be identified as Partnering PI(s). Initiating and Partnering PIs each have different submission requirements; however, all PIs should contribute significantly to the development of the proposed research project including the Project Narrative, Statement of Work, and other required components. The Initiating PI must complete the pre-application submission process and submit the contact information for each Partnering PI. Each Partnering PI will then be notified of the pre-application submission separately by email. **Each Partnering PI must follow the link in this email and register with eBRAP in order to associate his/her Grants.gov application package with that of the Initiating PI.** Do not delay completing these steps. If this is not completed, the Partnering PI will not be able to view and modify his/her application submission in eBRAP.

**A. Where to Obtain the Grants.gov Application Package**

To obtain the Grants.gov application package, including all required forms, perform a basic search using the Funding Opportunity Number W81XWH-15-PCRP-ERA in Grants.gov ([http://www.grants.gov/](http://www.grants.gov/)).

**B. Pre-Application Submission Content**

All pre-application components must be submitted by the PI or Initiating PI through eBRAP ([https://eBRAP.org/](https://eBRAP.org/)). Because the invitation to submit an application is based on the contents of
the pre-application, investigators should not change the title or research objectives after the preapplication is submitted.

PIs and organizations identified in the pre-application should be the same as those intended for the subsequent application submission. If any changes are necessary after submission of the preapplication, the PI must contact the CDMRP Help Desk at help@eBRAP.org or 301-682-5507.

A change in PI or organization after submission of the pre-application may be allowed after review of a submitted written appeal (contact the CDMRP Help Desk at help@eBRAP.org or 301-682-5507) and at the discretion of the USAMRAA Grants Officer.

The pre-application consists of the following components, which are organized in eBRAP by separate tabs (refer to the General Application Instructions, Section II.B., for additional information on pre-application submission):

- **Application Information – Tab 1**
- **Application Contacts – Tab 2**
  - Enter contact information for the PI. Enter the organization’s Business Official responsible for sponsored program administration (the “person to be contacted on matters involving this application” in Block 5 of the Grants.gov SF-424 form). The Business Official must either be selected from the eBRAP list or invited in order for the pre-application to be submitted.
  - It is recommended that PIs identify an Alternate Submitter in the event that assistance with pre-application submission is needed.
- **Collaborators and Key Personnel – Tab 3**
  - Enter the name, organization, and role of all collaborators and key personnel associated with the application.
  - FY15 PCRP IP members should not be involved in any pre-application or application. A list of FY15 PCRP IP members can be found at http://cdmrp.army.mil/pcrp/panels/panel15. For questions related to IP members and pre-applications or applications, refer to Section IV.C., Withdrawal, or contact help@eBRAP.org or 301-682-5507.
  - **Partnering PI Option**: The Initiating PI must enter the contact information for each Partnering PI in the Partnering PI section. This Program Announcement/Funding Opportunity allows a maximum of two Partnering PIs.
- **Conflicts of Interest (COIs) – Tab 4**
  - List all individuals other than collaborators and key personnel who may have a COI in the review of the application (including those with whom the PI has a personal or professional relationship).
• Pre-Application Files – Tab 5

Note: Upload document(s) as individual PDF files unless otherwise noted. eBRAP will not allow a file to be uploaded if the number of pages exceeds the limit specified below.

Preproposal Narrative (3-page limit): The Preproposal Narrative page limit applies to text and non-text elements (e.g., figures, tables, graphs, photographs, diagrams, chemical structures, drawings, etc.) used to describe the project. Inclusion of URLs that provide additional information to expand the Preproposal Narrative and could confer an unfair competitive advantage is prohibited and may result in administrative withdrawal of the pre-application.

The Preproposal Narrative should include the following:

○ **Background/Rationale:** Clearly present the ideas and reasoning behind the proposed research that specifically focus on identifying and understanding predictors of disease outcomes in exceptional responders to prostate cancer therapies, including any relevant literature citations.

○ **Objective:** State the objective to be reached.

○ **Research Approach:** State the project’s specific aims and briefly describe the experimental approach to accomplishing the aims. Clearly identify the group of exceptional responders to be studied, including the inclusion and exclusion criteria that will be used to identify those patients. Describe the availability of the necessary research resources, including human subjects or human anatomical samples, as well as a brief summary of the plan for acquiring these research resources.

○ **Research Team:** Describe the composition, expertise, and organization of the research team and each team member’s role in the project(s), with additional emphasis on the leadership role of the PI (or Initiating PI if using Partnering PI Option). Briefly describe how these features will facilitate the success of the key aspects the project(s). Include whether there is evidence of sufficient clinical expertise, if applicable.

○ **Partnering PI Option:** Describe how the research project is supported and strengthened by the proposed synergistic collaboration.

○ **Impact:** State how the proposed study will make a significant impact on the clinical management of prostate cancer. Also, state how the project is responsive to at least one of the PCRP overarching challenges and at least one of the PCRP focus areas.

Pre-Application Supporting Documentation: The items to be included as supporting documentation for the pre-application must be uploaded as individual documents and are limited to:

○ **References Cited (one-page limit):** List the references cited (including URLs if available) in the Preproposal Narrative using a standard reference format that includes the full citation (i.e., author[s], year published, title of reference, source of reference, volume, chapter, page numbers, and publisher, as appropriate).
• List of Abbreviations, Acronyms, and Symbols: Provide a list of abbreviations, acronyms, and symbols used in the Preproposal Narrative.

• Key Personnel Biographical Sketches (five-page limit per individual).

- Submit Pre-Application – Tab 6
  ○ This tab must be completed for the pre-application to be accepted and processed.

Pre-Application Screening

- Pre-Application Screening Criteria
  To determine the technical merits of the pre-application and the relevance to the mission of the DHP and the PCRP, pre-applications will be screened by the PCRP IP based on the following criteria:

  o Intent of the Award Mechanism: To what degree the proposed research project focuses on identifying and understanding predictors of disease outcomes in prostate cancer survivors that exhibit an exceptional response to prostate cancer therapy.

  o Research Approach: How well the rationale and specific aims support the project’s objective(s). Whether the criteria for identifying exceptional responders is clearly defined and appropriate for the study. Whether the necessary research resources, including human subjects or human anatomical samples, are available to and accessible by the PI(s).

  o Research Team: To what degree the background and prostate cancer-related expertise of the PI(s) and key personnel are appropriate with respect to their abilities to successfully complete the proposed work.

  o Impact: To what degree the proposed research has the potential to make a significant impact on the clinical management of prostate cancer, and is responsive to at least one of the PCRP overarching challenges and at least one of the PCRP focus areas.

- Notification of Pre-Application Screening Results
  o Following the pre-application screening, Initiating PIs will be notified as to whether or not they are invited to submit full applications; however, they will not receive feedback (e.g., a critique of strengths and weaknesses) on their pre-application. The estimated timeframe for notification of invitation to submit an application is indicated on the title page of this Program Announcement/Funding Opportunity.

C. Full Application Submission Content

Applications will not be accepted unless the PI or Initiating PI has received notification of invitation.

The CDMRP cannot make allowances/exceptions to its policies for submission problems encountered by the applicant organization using system-to-system interfaces with Grants.gov.
Each application submission must include the completed Grants.gov application package provided in Grants.gov for this Program Announcement/Funding Opportunity. The Grants.gov application package is submitted by the Authorized Organizational Representative through the Grants.gov portal (http://www.grants.gov/). For the ERA, additional application components are also required and should be submitted as directed below.

**Note:** The Project Narrative and Budget Form cannot be changed after the application submission deadline. If either the Project Narrative or the budget fails eBRAP validation or if the Project Narrative or Budget Form needs to be modified, an updated Grants.gov application package must be submitted via Grants.gov as a “Changed/Corrected Application” with the previous Grants.gov Tracking ID prior to the application submission deadline.

**Partnering PI Option:** The CDMRP requires separate Grants.gov application package submissions for the Initiating PI and each Partnering PI, even if the PIs are located within the same organization. Initiating and Partnering PIs will each be assigned unique log numbers by eBRAP. Each Grants.gov application package must be submitted using the unique log number.

**Note:** All associated applications (Initiating and each Partnering PI) must be submitted by the Grants.gov deadline.

**Application Components for the PI (for Single PI applicants) or the Initiating PI (if applying under the Partnering PI Option):**

**Grants.gov application package components:** For the FY15 PCRP Exceptional Responders Award, the Grants.gov application package includes the following components (refer to the General Application Instructions, Section II.C., for additional information on application submission):

1. **SF-424 (R&R) Application for Federal Assistance Form:** Refer to the General Application Instructions, Section II.C., for detailed information.

2. **Attachments Form**
   
   Each attachment to the Grants.gov application forms must be uploaded as an individual PDF file in accordance with the formatting guidelines listed in Appendix 2 of the General Application Instructions. For all attachments, ensure that the file names are consistent with the guidance. Grants.gov will reject attachments with file names longer than 50 characters or incorrect file names that contain characters other than the following: A-Z, a-z, 0-9, underscore, hyphen, space, and period. In addition, Grants.gov has file size limits that may apply in some circumstances. Individual attachments may not exceed 20 MB and the file size for the entire Grants.gov application package may not exceed 200 MB.

   - **Attachment 1: Project Narrative (15-page limit):** Upload as “ProjectNarrative.pdf.” The page limit of the Project Narrative applies to text and non-text elements (e.g., figures, tables, graphs, photographs, diagrams, chemical structures, drawings, etc.) used to describe the project. Inclusion of URLs that provide additional information to expand the Project Narrative and could confer an unfair competitive advantage is prohibited and may result in administrative withdrawal of the application.
Outline for Project Narrative: Describe the proposed project using the outline below.

○ **Background/Rationale:** Describe the proposed research that focuses on identifying and understanding predictors of disease outcomes in exceptional responders to prostate cancer therapies. Present the ideas and reasoning behind the proposed research, to include relevant literature citations, preliminary and/or pilot data, and/or other evidence that led to the proposed research. If the proposed study is correlative to an ongoing or completed clinical trial, explain the history and background of the clinical trial and declare the source of funding.

○ **Hypothesis or Objective:** State the hypothesis to be tested or the objective(s) to be attained.

○ **Specific Aims:** Concisely explain the project’s specific aims to be funded by this award. If this application is part of a larger study, present only tasks that this award would fund.

○ **Research Strategy:**
  - Describe the experimental design, methods, and analyses including appropriate controls in sufficient detail for analysis. Include a robust data and statistical analysis plan where appropriate.
  - Clearly identify the group of exceptional responders to be studied, including the inclusion and exclusion criteria that will be used to identify those patients.
  - If the methodology is new or unusual, provide sufficient details for evaluation.
  - Explain how this research strategy will meet the research goals and milestones. Address potential pitfalls and problem areas and present alternative methods and approaches.
  - Describe the availability of the necessary resources, including human subjects or human anatomical samples; include a detailed plan for the recruitment of subjects or the acquisition of samples. Address any potential ethical concerns. Outline how approvals from local IRBs will be obtained and how the informed consent process will be initiated, as applicable.
  - Provide an overall strategic plan for completing the proposed project. If the entire project will not be completed during the performance period of the award, provide evidence that sufficient funds will be available to complete the project.

○ **Research Team:** Describe the composition, expertise and organization of the research team and each team member’s role in the project(s), with additional emphasis on the leadership role of the PI. Briefly describe how these features will facilitate the success of the key aspects the project(s). Include whether there is evidence of sufficient clinical expertise, if applicable.
• **Attachment 2: Supporting Documentation.** Start each document on a new page. Combine and upload as a single file named “Support.pdf.” If documents are scanned to pdf, the lowest resolution (100 to 150 dpi) should be used. **There are no page limits for any of these components unless otherwise noted. Include only those components described below; inclusion of items not requested will result in the removal of those items or may result in administrative withdrawal of the application.**

  o References Cited: List the references cited (including URLs if available) in the Project Narrative using a standard reference format that includes the full citation (i.e., author[s], year published, title of reference, source of reference, volume, chapter, page numbers, and publisher, as appropriate).

  o List of Abbreviations, Acronyms, and Symbols: Provide a list of abbreviations, acronyms, and symbols.

  o Facilities, Existing Equipment, and Other Resources: Describe the facilities and equipment available for performance of the proposed project and any additional facilities or equipment proposed for acquisition at no cost to the award. Indicate whether or not Government-furnished facilities or equipment are proposed for use. If so, reference should be made to the original or present Government award under which the facilities or equipment items are now accountable. There is no form for this information.

  o Publications and/or Patent Abstracts: Include a list of relevant publication URLs and/or patent abstracts. If publications are not publicly available, then copies of up to five published manuscripts may be included in Attachment 2. Extra items will not be reviewed.

  o Letters of Organizational Support: Provide a letter (or letters, if applicable), signed by the Department Chair or appropriate organization official, confirming the laboratory space, equipment, and other resources available for the project. Letters of support not requested in the Program Announcement/Funding Opportunity, such as those from members of Congress, do not impact application review or funding decisions.

  o Letters of Collaboration (if applicable): Provide a signed letter from each collaborating individual or organization that will demonstrate that the PI has the support or resources necessary for the proposed work, to include:
    - Unique expertise,
    - Availability of and access to research resources, and/or
    - Availability of and access to appropriate populations (and/or access to available samples/data or database[s]) (if applicable).

  o Intellectual Property
    - Background and Proprietary Information: All software and data first produced under the award are subject to a Federal purpose license. Provide a list of all background intellectual property to be used in the project or provide a statement that none will be used. If applicable, state and identify the
proprietary information that will be provided to the Government and indicate whether the applicant will require a waiver of the Federal purpose license.

- Intellectual and Material Property Plan (if applicable): Provide a plan for resolving intellectual and material property issues among participating organizations.

- **Attachment 3: Technical Abstract (one-page limit): Upload as “TechAbs.pdf.”** Use only characters available on a standard QWERTY keyboard. Spell out all Greek letters, other non-English letters, and symbols. Graphics are not allowed. The technical abstract is used by all reviewers. Of particular importance, programmatic reviewers typically do not have access to the full application and therefore rely on the technical abstract for appropriate description of the project’s key aspects. Therefore, clarity and completeness within the space limits of the technical abstract are highly important.

  Use the outline below.

  - Background: Present the ideas and reasoning behind the proposed work.
  - Objective: State the objective to be reached. Provide evidence or rationale that supports the objective/hypothesis.
  - Specific Aims: State the specific aims of the study.
  - Study Design: Briefly describe the study design, including appropriate controls.
  - Impact: Summarize the potential the proposed research has to make a significant impact on the clinical management of prostate cancer.

- **Attachment 4: Lay Abstract (one-page limit): Upload as “LayAbs.pdf.”** Use only characters available on a standard QWERTY keyboard. Spell out all Greek letters, other non-English letters, and symbols. Graphics are not allowed. The lay abstract is used by all reviewers. Of particular importance, programmatic reviewers typically do not have access to the full application and therefore rely on the lay abstract for appropriate description of the project’s key aspects.

  - Clearly describe, in a manner readily understood by readers without a background in science or medicine, the rationale, objective, and aims of the application.
    - Do not duplicate the technical abstract.
  - Describe the ultimate applicability of the research.
    - What types of patients will it help and how will it help them?
    - What are the potential clinical applications, benefits, and risks?
    - What is the projected time it may take to achieve a patient-related outcome?
    - What is the likely impact of this study on addressing a central question or problem in prostate cancer?
Attachment 5: Statement of Work (SOW) (three-page limit): Upload as “SOW.pdf.” The suggested SOW format and examples specific to different types of research projects are available on the eBRAP “Funding Opportunities & Forms” web page (https://ebrap.org/eBRAP/public/Program.htm). For the Exceptional Responders Award mechanism, use the SOW format example titled “SOW (Statement of Work) Generic Format.” The SOW must be in PDF format prior to attaching. Refer to the General Application Instructions, Section II.C.3., for detailed guidance on creating the SOW.

Partnering PI Option: Each PI must submit an identical copy of a jointly created SOW. The contributions of the Initiating PI and Partnering PI(s) should be noted for each task.

Attachment 6: Impact Statement (two-page limit): Upload as “Impact.pdf.” Explain in detail why the proposed research project is important, as follows:

Describe the short-term impact: Detail the anticipated outcome(s)/product(s) that will be directly attributed to the results of the proposed research, including any clinically relevant results, and how they contribute to an increased understanding of the predictors of disease outcomes in exceptional responders to prostate cancer therapies.

Describe the long-term impact: Explain the anticipated long-term gains from the proposed research, including how the new understanding may contribute to the clinical management of prostate cancer.

PCRP overarching challenges and focus areas: Summarize how the proposed project addresses one of the PCRP overarching challenges and at least one other focus area.

Attachment 7: Partnership Statement (one-page limit): Upload as “Partnership.pdf.” (if applicable)

Describe the expertise of the Initiating and Partnering PIs. Describe their specific contributions to the project(s) and how the appropriate expertise is necessary to address the research question and enable the success of the proposed project(s). Describe how the combined effort will better address the research question and explain why the work should be done together rather than through separate efforts.

Describe how unique and/or final research data will be shared with the wider prostate cancer research and consumer communities, along with any resulting research resources. This includes cases where pre-existing data or research resources will be utilized and/or modified during the course of the proposed project. If there are limitations associated with a pre-existing agreement for the original data or research resources that preclude subsequent sharing, the applicant should explain this in the data- and/or research resource-sharing plan. Include whether samples
have been or will be submitted to the National Cancer Institute’s Exceptional Responders Initiative.

Refer to the General Application Instructions, Appendix 4, Section K, for additional information.

- **Attachment 9: Collaborating DoD Military Facility Budget Form(s), if applicable:** Upload as “MFBudget.pdf.” If a Military Facility (military health system facility, research laboratory, treatment facility, dental treatment facility, or a DoD activity embedded with a civilian medical center) will be a collaborator in performance of the project, complete the Collaborating DoD Military Facility Budget Form (available for download on the eBRAP “Funding Opportunities & Forms” web page), including a budget justification, for each Military Facility as instructed. Refer to the General Application Instructions, Section II.C.8., for detailed information.

3. **Research & Related Senior/Key Person Profile (Expanded):** Refer to the General Application Instructions, Section II.C.4., for detailed information. Note: Some of the items in this attachment may be made available for programmatic review.

- PI Biographical Sketch (five-page limit): Upload as “Biosketch_LastName.pdf.” The suggested biographical sketch format is available on the “Funding Opportunities & Forms” web page (https://ebrap.org/eBRAP/public/Program.htm) in eBRAP. The five-page National Institutes of Health Biographical Sketch may also be used.
- PI Previous/Current/Pending Support (no page limit): Upload as “Support_LastName.pdf.”
- Key Personnel Biographical Sketches (five-page limit each): Upload as “Biosketch_LastName.pdf.”
  - Include biographical sketches for the Initiating and Partnering PI(s).
- Key Personnel Previous/Current/Pending Support (no page limit): Upload as “Support_LastName.pdf.”
  - Include previous/current/pending support for the Initiating and Partnering PI(s).

4. **Research & Related Budget:** Refer to the General Application Instructions, Section II.C.5., for detailed information.

- **Budget Justification (no page limit):** Upload as “BudgetJustification.pdf.” The budget justification for the entire period of performance must be uploaded to the Research & Related Budget after completion of the budget for Period 1.
- **Partnering PI Option:** Initiating and Partnering PIs must each submit a budget and justification specific to their own portion of the efforts as part of their separate Grants.gov application packages. The Research & Related Budget for the Initiating PI should not include budget information for the Partnering PI(s), even if they are at the same organization. The anticipated combined direct costs budgeted for the
entire period of performance for the Initiating PI and the Partnering PI(s) applications will not exceed $2.5M. The combined total direct costs of Initiating PI and the Partnering PI(s) awards will not exceed $2.5M direct costs. If the Initiating PI’s or Partnering PI’s budgets contain a subaward (or multiple subawards), all direct and indirect costs of the subaward(s) must be included in the direct costs of the primary award. Collaborating organizations should budget associated indirect costs in accordance with each organization’s negotiated rate. The combined budgeted direct costs approved by the Government will not exceed $2.5M or use an indirect rate exceeding each organization’s negotiated rate.

5. **Project/Performance Site Location(s) Form:** Refer to the General Application Instructions, Section II.C.6., for detailed information.

6. **R & R Subaward Budget Attachment(s) Form (if applicable):** Refer to the General Application Instructions, Section II.C.7., for detailed information.

**Application Components for the Partnering PI(s):**

*Each Partnering PI MUST follow the link in the email from eBRAP and complete the registration process prior to the application submission deadline in order to associate his/her Grants.gov application package with that of the Initiating PI.*

The application submission process for Partnering PI(s) uses an abbreviated Grants.gov application package that includes:

1. **SF-424 (R&R) Application for Federal Assistance Form**

2. **Attachments Form**

   - **Attachment 5: Statement of Work (SOW) (three-page limit):** Upload as “SOW.pdf.” Refer to the General Application Instructions, Section II.C.3., for detailed information on completing the SOW. *Each PI must submit an identical copy of a jointly created SOW. The contributions of the Initiating PI and Partnering PI(s) should be noted for each task.*

3. **Research & Related Budget:** Refer to the General Application Instructions, Section II.C.5., for detailed information.

   - **Budget Justification (no page limit):** Upload as “BudgetJustification.pdf.”

   - **Partnering PI Option:** Initiating and Partnering PIs must each submit a budget and justification specific to their own portion of the efforts as part of their separate Grants.gov application packages. The Research & Related Budget for the Partnering PI(s) should not include budget information for the Initiating PI, even if they are at the same organization. The anticipated combined direct costs budgeted for the entire period of performance for the Initiating PI and the Partnering PI(s) applications will not exceed $2.5M. The combined total direct costs of Initiating PI and the Partnering PI(s) awards will not exceed $2.5M direct costs. If the Initiating
PI’s or Partnering PI’s budgets contain a subaward (or multiple subawards), all direct and indirect costs of the subaward(s) must be included in the direct costs of the primary award. Collaborating organizations should budget associated indirect costs in accordance with each organization’s negotiated rate. The combined budgeted direct costs approved by the Government will not exceed $2.5M or use an indirect rate exceeding each organization’s negotiated rate.

4. **Project/Performance Site Location(s) Form:** Refer to the General Application Instructions, Section II.C.6., for detailed information.

5. **R & R Subaward Budget Attachment(s) Form (if applicable):** Refer to the General Application Instructions, Section II.C.7., for detailed information.

**Additional Application Components:** In addition to the complete Grants.gov application package, Exceptional Responder Award applications also require the following components:

**Oral Presentation:** Initiating PIs applying whose applications are selected for final consideration in Stage 2 of Programmatic Review will be required to give an oral presentation (see Section III.B.2., Programmatic Review) that will be held in the National Capital Region area in February 2016.

Each presentation will include a 10-minute talk by the Initiating PI, followed by a 20-minute question-and-answer session with IP members. The oral presentation should not be used to reiterate the technical/scientific details of the project already described in the written application. Rather, the following questions will be the topics for discussion during the PI’s talk and the question-and-answer session. A PI who is invited must prepare a five-slide presentation that specifically addresses these questions:

- Without addressing the specific technical/scientific aspects of your project, what do you consider to be the most critical barriers to overcome in identifying and understanding predictors of disease outcomes in exceptional responders to prostate cancer therapies, and how do the goals of your proposed effort relate to other current efforts to address these barriers?
- Without addressing the specific technical/scientific aspects of your project, how do you envision transitioning the results from your efforts into the clinic to provide a significant impact on the clinical management of prostate cancer and, in addition, ultimately contribute significantly to the elimination of death from prostate cancer and enhancing the well-being of men experiencing the impact of the disease?
- Without addressing the specific technical/scientific aspects of your project, what leadership skills will you use in your research team’s efforts to move the project quickly and effectively toward completion of the objectives?

**D. Applicant Verification of Grants.gov Submission in eBRAP**

Prior to the end of the application verification period, PIs and organizational representatives can review and modify in eBRAP certain components of an application submitted to Grants.gov. Following retrieval and processing of the Grants.gov application, eBRAP will notify the
organizational representatives and PI by email to log into eBRAP to review, modify, and verify the Grants.gov application submission. eBRAP will validate retrieved files against the specific Program Announcement/Funding Opportunity requirements and discrepancies will be noted in both the email and in the Full Application Files tab in eBRAP. eBRAP does not confirm the accuracy of file content. It is the applicant’s responsibility to review all application components and ensure proper ordering as specified in the Program Announcement/Funding Opportunity. *If either the Project Narrative or the budget fails eBRAP validation, an updated Grants.gov application package must be submitted via Grants.gov as a “Changed/Corrected Application” with the previous Grants.gov Tracking ID prior to the application submission deadline.* The Project Narrative and Budget Form cannot be changed after the application submission deadline.

E. Submission Dates and Times

All submission dates and times are indicated on the title page of this Program Announcement/Funding Opportunity. Pre-application and application submissions are required. Failure to meet either of these deadlines will result in application rejection.

F. Other Submission Requirements

Refer to the General Application Instructions, Appendix 2, for detailed formatting guidelines.

All applications must be submitted through Grants.gov. Applicant organizations and all subrecipient organizations must have a DUNS number to submit applications to Grants.gov. The applicant organization must also be registered in the Entity Management functional area of the SAM with an “Active” status to submit applications through the Grants.gov portal. Refer to the General Application Instructions, Section II.A., for information on Grants.gov registration requirements.

III. APPLICATION REVIEW INFORMATION

A. Application Review and Selection Process

All applications are evaluated by scientists, clinicians, and consumer advocates using a two-tier review process. The first tier is peer review of applications against established criteria for determining technical merit. The second tier is a programmatic review that makes recommendations for funding to the DHA RDA Directorate and the Office of the Assistant Secretary of Defense for Health Affairs, based on (a) technical merit and (b) the relevance to the mission of the DHP and PCRP, and to the specific intent of the award mechanism. The highest-scoring applications from the first tier of review are not automatically recommended for funding. Additional information about the two-tier process used by the CDMRP can be found at [http://cdmrp.army.mil/about/fundingprocess](http://cdmrp.army.mil/about/fundingprocess).

All CDMRP review processes are conducted confidentially to maintain the integrity of the merit-based selection process. Panel members sign a nondisclosure statement that application and evaluation information will not be disclosed outside the panel. Violations of confidentiality can result in the dissolving of a panel(s) and other corrective actions. In addition, personnel at the applicant or collaborating organizations are prohibited from contacting persons involved in the
review process to gain protected evaluation information or to influence the evaluation process. Violations of these prohibitions will result in the administrative withdrawal of the organization’s application. Violations by panel members or applicants that compromise the confidentiality of the review process may also result in suspension or debarment from Federal awards. Furthermore, the unauthorized disclosure of confidential information of one party to another third party is a crime in accordance with Title 18 United States Code 1905.

B. Application Review Process

1. **Peer Review:** To determine technical merit, all applications will be evaluated according to the following scored criteria, which are of equal importance:

   - **Impact**
     - To what degree the proposed project, if successful, will have a significant impact on identifying and understanding predictors of disease outcomes in exceptional responders to prostate cancer therapies.
     - To what degree the proposed research, if successful, would make a significant impact on the clinical management of prostate cancer.
     - How well the proposed research addresses one of the PCRP overarching challenges and at least one other PCRP focus area.

   - **Research Strategy and Feasibility**
     - How well the scientific rationale supports the research and its feasibility, as demonstrated by a critical review and analysis of the literature, the presentation of preliminary data, and logical reasoning.
     - How well the hypotheses or objectives, aims, experimental design, methods, and analyses are developed and integrated into the project.
     - Whether the criteria for identifying exceptional responders is clearly defined and appropriate for the study.
     - How well the PI acknowledges potential problems and addresses alternative approaches.
     - Whether the PI has provided sufficient evidence to support availability of and access to the populations/samples required for the study, and whether the plan for acquiring the necessary research resources is sufficient for the proposed research project (if applicable).
     - Whether the PI has provided sufficient evidence that resources will be available to complete longitudinal follow-up beyond the period of performance (if applicable).

   - **Personnel**
     - To what degree each PI possesses the leadership skills to successfully lead the research team and achieve the outcomes of the research.
○ To what degree the research team’s background and prostate cancer-related expertise are appropriate with respect to its ability to perform the proposed work, including whether there is evidence of sufficient clinical expertise (if applicable).

○ To what degree the levels of effort are appropriate for successful conduct of the proposed work.

○ **Partnering PI Option:** How the proposed partnership between the PIs is likely to result in a level of productivity that is greater than that achievable by each PI working independently.

In addition, the following unscored criteria will also contribute to the overall evaluation of the application:

- **Application Presentation**
  ○ To what extent the writing, clarity, and presentation of the application components influence the review.

- **Ethics and/or Regulatory Issues**
  ○ Whether potential problems regarding ethics, information privacy, and assessment of risk versus benefit of participation have been adequately considered (if applicable).

- **Environment**
  ○ To what degree the scientific environment is appropriate for the proposed research.

  ○ How well the research requirements are supported by the availability of and accessibility to facilities and resources (including patient populations, samples, and collaborative arrangements).

  ○ To what degree the quality and extent of organizational support are appropriate for the proposed research.

  ○ If applicable, to what degree the intellectual and material property plan is appropriate.

- **Data and Resource Sharing**
  ○ To what degree the plan for sharing of project data and research resources is appropriate and reasonable to facilitate use by the wider prostate cancer research and consumer communities.

- **Budget**
  ○ Whether the budget is appropriate for the proposed research and within the limitations of this Program Announcement/Funding Opportunity.

- **Application Presentation**
  ○ To what extent the writing, clarity, and presentation of the application components influence the review.
2. **Programmatic Review:** To make funding recommendations and select the application(s) that, individually or collectively, will best achieve the program objectives, the following equally considered criteria are used by programmatic reviewers:

   a. **Ratings and evaluations of the peer reviewers**

   b. **Relevance to the mission of the DHP and FY15 PCRP, as evidenced by the following:**

      - **Stage 1:** During the first stage of programmatic review, applications will be selected for the second stage using the following criteria:

        o Adherence to the intent of the award mechanism
        o Programmatic relevance in relation to the PCRP overarching challenges and focus areas
        o Relative impact
        o Program portfolio composition

      - **Stage 2:** During the second stage of programmatic review, the following criteria will be used:

        o Understanding of critical barriers to overcome in identifying and understanding predictors of disease outcomes in exceptional responders to prostate cancer therapies.
        o Articulation of a vision for achieving an outcome that will be translatable into clinical practice.
        o Capability to lead and synergize the research team’s efforts to effectively accomplish the aims of the project.

C. **Recipient Qualification**

For general information on required qualifications for award recipients, refer to the General Application Instructions, Appendix 1.

D. **Application Review Dates**

All application review dates and times are indicated on the title page of this Program Announcement/Funding Opportunity.

E. **Notification of Application Review Results**

Each PI and organization will receive email notification of posting of the funding recommendation in eBRAP. Each PI will receive a peer review summary statement on the strengths and weaknesses of the application.
IV. ADMINISTRATIVE ACTIONS

After receipt of pre-applications from eBRAP or applications from Grants.gov, the following administrative actions may occur:

A. Rejection

The following will result in administrative rejection of the pre-application:

- Preproposal Narrative exceeds page limit.
- Preproposal Narrative is missing.

The following will result in administrative rejection of the application:

- Submission of an application for which a letter of invitation was not received.
- Pre-application was not submitted.
- Project Narrative exceeds page limit.
- Submission of the same research project to different funding opportunities within the same program and fiscal year.
- Project Narrative is missing.
- Budget is missing.

B. Modification

- Pages exceeding the specific limits will be removed prior to review for all documents other than the Preproposal Narrative and Project Narrative.
- Documents not requested will be removed.

C. Withdrawal

The following may result in administrative withdrawal of the pre-application or application:

- A FY15 PCRP IP member is named as being involved in the research proposed or is found to have assisted in the pre-application or application processes including, but not limited to, concept design, application development, budget preparation, and the development of any supporting documentation. A list of the FY15 PCRP IP members can be found at http://cdmrp.army.mil/pcrp/panels/panel15.
- The application fails to conform to this Program Announcement/Funding Opportunity description to the extent that appropriate review cannot be conducted.
- Inclusion of URLs, with the exception of links in References Cited and Publication and/or Patent Abstract sections.
- Page size is larger than 8.5 inches x 11.0 inches (approximately 21.59 cm x 27.94 cm).
- Inclusion of any employee of CDMRP review contractors in applications for funding without adequate plans to mitigate conflicts of interest. Refer to the General Application Instructions, Section II.B., for detailed information.
• Personnel from applicant or collaborating organizations are found to have contacted persons involved in the review process to gain protected evaluation information or to influence the evaluation process.

• The invited application does not propose the same research project described in the pre-application.

• If a clinical trial is proposed, the application will be withdrawn.

• An application submitted by a PI who does not meet the eligibility criteria will be withdrawn.

• If all associated (Initiating and Partnering PI) applications are not submitted by the deadline, the application may be withdrawn.

D. Withhold

Applications that appear to involve research misconduct will be administratively withheld from further consideration pending institutional investigation. The institution will be required to provide the findings of the investigation to the USAMRAA Grants Officer for a determination of the final disposition of the application.

V. AWARD ADMINISTRATION INFORMATION

A. Award Notice

Awards will be made no later than September 30, 2016. Refer to the General Application Instructions, Appendix 3, for additional award administration information.

Any assistance instrument awarded under this Program Announcement/Funding Opportunity will be governed by the award terms and conditions, which conform to DoD’s implementation of the Office of Management and Budget (OMB) circulars applicable to financial assistance. Terms and conditions of new awards made after December 26, 2014 may include revisions to reflect DoD implementation of new OMB guidance in the Code of Federal Regulations, Title 2, Part 200, “Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards” (2 CFR part 200).

B. Administrative Requirements

Refer to the General Application Instructions, Appendix 3 for general information regarding administrative requirements.

C. National Policy Requirements

Refer to the General Application Instructions, Appendix 4 for general information regarding national policy requirements.

D. Reporting

Refer to the General Application Instructions, Appendix 3, Section I, for general information on reporting requirements.

Attendance is required at a 1-day meeting to be held in the National Capital Area for the purpose of reporting on progress.
If employing the Partnering PI Option, each PI, whether the Initiating or a Partnering PI, must submit individual progress reports as required by his/her individual assistance agreement. For all awards including prospective accrual of human subjects, quarterly technical progress reports will be required.

E. Award Transfers

Changes in PI are not allowed, except under extenuating circumstances that will be evaluated on a case-by-case basis and at the discretion of the Grants Officer.

Refer to the General Application Instructions, Appendix 3, Section M, for general information on organization or PI changes.

F. Pre-Award Meeting

At the Government’s discretion, the PI or other personnel may be requested to participate in a pre-award meeting at the Government’s expense.

VI. AGENCY CONTACTS

A. CDMRP Help Desk

Questions related to Program Announcement/Funding Opportunity content or submission requirements as well as questions related to the submission of the pre-application through eBRAP should be directed to the CDMRP Help Desk, which is available Monday through Friday from 8:00 a.m. to 5:00 p.m. ET. Response times may vary depending upon the volume of inquiries.

Phone: 301-682-5507
Email: help@eBRAP.org

B. Grants.gov Contact Center

Questions related to application submission through Grants.gov portal should be directed to the Grants.gov Contact Center, which is available 24 hours a day, 7 days a week (closed on U.S. Federal holidays). Note that the CDMRP Help Desk is unable to provide technical assistance with Grants.gov submission.

Phone: 800-518-4726
Email: support@grants.gov

Sign up on Grants.gov for “send me change notification emails” by following the link on the Synopsis page for the Program Announcement/Funding Opportunity or by responding to the prompt provided by Grants.gov when first downloading the Grants.gov application package. If the Grants.gov application package is updated or changed, the original version of the application package may not be accepted by Grants.gov.
## VII. APPLICATION SUBMISSION CHECKLIST
